

GET A LIFE STATION DESCRIPTIONS

The 529 Station

Students will visit this station after they have completed the Red Card round of purchases. At this station, they will trade the Red Life Card with high school diploma credentials and their original Ledger Sheet. In return they will receive a Green Life Card for the second round of purchases and a fresh Ledger Sheet. The new cards will represent an upgrade in their occupation. A different family scenario will be reflected in the Green Cards. These careers will require additional certifications beyond the high school diploma. Vocational educational jobs, college degree professions, and certifications for a variety of skills will be available. The best part is that the income level will increase as the educational achievements increase. Students will continue with a second round of purchases to provide the necessities to keep their families safe and healthy. The goal is for the students to make better choices and maintain a positive amount of money at the end of the budget exercise.
